PROFESSIONAL PROFILE

PHP developer with professional experience since 2018, building and maintaining business applications for vehicle operations, inventory, and e-commerce. Works remotely with a Singapore-based team on Fleetnetics, translating business requirements into backend features, reports, and workflow changes. Experienced in debugging application and data issues, external integrations, and leading a team of four developers.

PROFESSIONAL EXPERIENCE

PHP Web Developer

DewTouch Innovations Pte Ltd

August 2023 - Present · Singapore / Remote

- Develop and maintain enterprise web applications using PHP, MySQL, and CakePHP ORM, including vehicle operations and parts inventory systems.
- Implement rental reports, delivery-job validations, and updates to parts and inventory workflows based on client requirements.
- Trace application defects and data inconsistencies through existing PHP code, database queries, and logs; implement and test fixes.
- Implement automated data exports and SFTP transfers to external distributor systems.
- Clarify requirements with colleagues and clients, prepare changes for demo testing, and support live patches after review.

Senior Software Engineer

Aceplus Solutions Company Ltd

April 2019 - January 2023 · Yangon, Myanmar

- Led a team of four developers delivering and maintaining client web applications.
- Developed e-commerce and fan club websites and integrated payment gateways.
- Translated client requirements into features with the business team, supporting delivery from requirements through deployment.
- Troubleshot issues and maintained features across multiple client projects.

Junior Software Engineer

Aceplus Solutions Company Ltd

February 2018 - March 2019 · Yangon, Myanmar

- Built reusable components, new features, and supporting test scripts.
- Contributed to PHP 5 to PHP 7 upgrades, MySQL queries, bug fixes, documentation, and deployments.
- Promoted to Senior Software Engineer in April 2019.

Junior Software Engineer & Intern

New West Minster

December 2015 - 2018 · Yangon, Myanmar

- Delivered two individual web applications and contributed to an Android application with a team.
- Supported a startup project, prepared user documentation, and assisted with project launch and hackathon events.

TECHNICAL SKILLS

Core expertise
PHP, MySQL, CakePHP ORM, business workflows, debugging, Git, SFTP integrations

Frameworks & APIs
Laravel, CodeIgniter, Ruby on Rails, REST APIs, EC-CUBE

Frontend & platforms
JavaScript, Vue.js, jQuery, HTML, CSS, Bootstrap, AJAX, Linux, Windows

Development practice
Codex for code exploration and implementation support; practising Docker, GitHub Actions, and independent deployment

SELECTED PROJECTS

PROFESSIONAL PROJECT

Vehicle Management System

Develop and maintain backend features for vehicle operations and after-sales services. Work includes rental reporting, delivery-job rules, and investigating issues reported by users.

PROFESSIONAL PROJECT

Parts Inventory & Warehouse Management

Implement inventory tracking, stock calculations, warehouse transfers, and validation. Investigate stock-in and stock-out workflow issues and maintain related backend logic.

PROFESSIONAL PROJECTS

E-commerce & Community Platforms

B2C shopping and subscription features, a group-based article sharing platform, and recruitment features with REST APIs for mobile applications.

PERSONAL PROJECT · IN PROGRESS

Rental Management API

A Laravel REST API for staff to manage customers, vehicles, and rental records.

- Built related models, migrations, CRUD endpoints, and request validation.
- Implemented authentication, authorization, and automated tests.
- Practising Docker-based development and a GitHub Actions workflow for tests and image builds.
